# My profile

22 years as a teacher

**Mechanical Engineer**

**Professor of Vocational Training in Automotive Engineering**

**Erasmus+ Coordinator and Ambassador**

Shell  
Eco-marathon

## We passed Technical Inspection!

# Erasmus+, a way of life

34 years separate the first image from the second. My first experience in Bournemouth (England) and my last move to Eindhoven (Netherlands). A lifetime of enriching experiences.

Our values

# Promoting European values, inclusion and integration

Our priority in carrying out the mobility programs has been that all participants acquire a civic commitment, common EU values, and that as European citizens they can actively participate in society at the local, national, and European levels.

Enriqueciendo vidas, abriendo mentes.

Advanced Car Mechanics Education (ACME), the Erasmus+ project coordinated by IES La Marxadella, aims to revolutionize automotive training. The project's objective has been to improve training in vocational training centers, address knowledge gaps in each institution, and promote the use of digital technologies to foster inclusion and gender equality.

thank you
