

ELEGIBILITY CRITERIA

- Beneficiaries have to be education professionals at primary and secondary level (teachers, head teachers, inspectors, pedagogical advisers, child psychologists, school staff, textbook authors, teacher trainers, etc.). They must be nationals of a signatory State to the European cultural Convention and must commit themselves to play an active role as multipliers after the European Workshop;
- The European Workshop must be relevant to the candidate's work;
- The candidate must have an active knowledge of the working language of the European Workshop;
- Candidate's experience in the field covered by the European Workshop: attendance is not enough - candidates must also contribute their knowledge and experience to the discussion. Pre-selection should therefore give preference to those who have already taken part in national discussions or in school projects dealing with the theme of the European Workshop;
- The candidate's potential as a multiplier: this criterion will obviously favor teacher trainers, curriculum-planners, authors of textbooks and other classroom aids, subject coordinators, head teachers, inspectors and other administrators.

The balance between pre-selected candidates must take equitably into consideration the regions, types of schools, themes, etc.

Candidates who participated in a European Workshop in the context of the Pestalozzi Programme within the last 2 years: no candidate is allowed to participate in more than one European Workshop in a two-year period (from date to date).

Pestalozzi Programme, *NLO Guide 2014*
